

# loyal Deep Groove Ball Bearings (6000, 6200, 6300, 6400) | 6010/ZZ/NR

Bearing No. 6010/ZZ/NR

|                                               |                        |
|-----------------------------------------------|------------------------|
| Weight                                        | Shields With Snap Ring |
| Radius Rs min                                 | 0.25 Kg                |
| Outside Ring Width B                          | 1.000 mm               |
| Outside Diameter D                            | 16.000 mm              |
| Features                                      | 80.000 mm              |
| Cr - Dynamic Load Rating                      | 12000 rpm              |
| C0r - Static Load Rating                      | 8300 rpm               |
| Bore Size d                                   | 21.80 kN               |
| Clearance                                     | C0 (Normal)            |
| Bearing Type                                  | 16.5 kN                |
| Grease Reference Speed                        | 50 mm                  |
| Oil Reference Speed                           | Standard DGBB          |
| r - Outer Ring "To Clear" Radius <sup>3</sup> | 1.700 mm               |
