## Deep Groove Ball Bearings (6000, 6200, 6300, 6400) | 6201/2RS/NR/C3

Bearing No. 6201/2RS/NR/C3

|                                               |                              |
|-----------------------------------------------|------------------------------|
| Weight                                        | Contact Seals With Snap Ring |
| Radius Rs min                                 | 0.040 Kg                     |
| Outside Ring Width B                          | 0.600 mm                     |
| Outside Diameter D                            | 10.000 mm                    |
| Features                                      | 32.000 mm                    |
| Cr - Dynamic Load Rating                      | 30000 rpm                    |
| C0r - Static Load Rating                      | 21000 rpm                    |
| Bore Size d                                   | 6.8 kN                       |
| Clearance                                     | C3                           |
| Bearing Type                                  | 3 kN                         |
| Grease Reference Speed                        | 12 mm                        |
| Oil Reference Speed                           | Standard DGBB                |
| r - Outer Ring "To Clear" Radius <sup>3</sup> | 1.120 mm                     |
