

# loyal Deep Groove Ball Bearings (6000, 6200, 6300, 6400) | 6211/Z/NR/C3

Bearing No. 6211/Z/NR/C3

|                                               |                           |
|-----------------------------------------------|---------------------------|
| Weight                                        | One Shield With Snap Ring |
| Radius Rs min                                 | 0.61 Kg                   |
| Outside Ring Width B                          | 1.500 mm                  |
| Outside Diameter D                            | 21.000 mm                 |
| Features                                      | 100.000 mm                |
| Cr - Dynamic Load Rating                      | 10000 rpm                 |
| C0r - Static Load Rating                      | 7000 rpm                  |
| Bore Size d                                   | 43.4 kN                   |
| Clearance                                     | C3                        |
| Bearing Type                                  | 29.2 kN                   |
| Grease Reference Speed                        | 55 mm                     |
| Oil Reference Speed                           | Standard DGBB             |
| r - Outer Ring "To Clear" Radius <sup>3</sup> | 2.460 mm                  |
