

# loyal Deep Groove Ball Bearings (6000, 6200, 6300, 6400) | 6307/Z/NR/C3

**Bearing No. 6307/Z/NR/C3**

|                                               |                           |
|-----------------------------------------------|---------------------------|
| Weight                                        | One Shield With Snap Ring |
| Radius Rs min                                 | 0.45 Kg                   |
| Outside Ring Width B                          | 1.500 mm                  |
| Outside Diameter D                            | 21.000 mm                 |
| Features                                      | 80.000 mm                 |
| Cr - Dynamic Load Rating                      | 13000 rpm                 |
| C0r - Static Load Rating                      | 9300 rpm                  |
| Bore Size d                                   | 33.4 kN                   |
| Clearance                                     | C3                        |
| Bearing Type                                  | 19.2 kN                   |
| Grease Reference Speed                        | 35 mm                     |
| Oil Reference Speed                           | Standard DGBB             |
| r - Outer Ring "To Clear" Radius <sup>3</sup> | 1.700 mm                  |
